

# How To Assemble Your Drum Set

## Bass Drum Assembly

Bass Drum Parts  
Shell  
Hoops  
Heads  
Claws & Tension Rods

Place the top drum head to the drum shell

Fit the hoop on top of the drum head-placing it evenly around the drum head. Notice: The head with logo is the front head.

Take your bass drum claw and tension rod and place it over the bass drum lug and loosely put in the tension rod. Once you have placed all your claws and rods in place tighten. Repeat for other side.

## Tom Assembly

Tom Parts  
Shell  
Hoops  
Heads  
Tension Rods

Place the top drum head to the drum shell

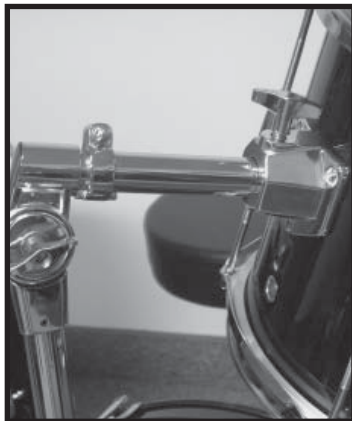

Fit the rim on top of the drum head-placing it over the drum lugs.

Take your tom tension rod and loosely put in the tension rod. Once you have placed all tension rods in place tighten using a star pattern. Repeat for other side.

Insert the long end of the tom holder into the bass drum mount. Then tighten the wing nut. Using the joint of the tom holder you may adjust the position of the tom drum. Repeat process for other side.

Slide your tom onto the arm, adjust to your liking then tighten the wing nut.

After building your floor tom turn the floor tom upside down (notice the leg mounts should be close to you) slide the legs into mounts then tighten.

Place your snare drum onto the snare stand. Adjust the stand to fit the snare drum then tighten.

# The 5 Minute Drum Lesson

Here are some basic rudiments to help you get started playing drums. The beats include the quarter note, flam, paradiddle and double stroke roll. These are the building blocks every drummer uses to learn how to play the drums.
